

MA900

General Description

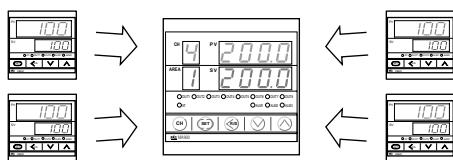

The MA900 controls up to 4 channels in a compact 1/4 DIN size. The MA900 increases zone density and makes smaller numbers of loops affordable, yet still holds many of the advantages that a single loop controller might offer. This unit will aid designers of control equipment saving labor costs, installation costs, electric panel sizes, and operation costs.

Features

- ★ 4 channels of control
- ★ Multi-memory area
- ★ Digital communications
- ★ Heat/Cool action
- ★ Digital contact input
- ★ Multiple alarm functions
- ★ Close horizontal mounting
- ★ IP65 Waterproof/dustproof protection

4 channels Control

4 channels of temperature controls are packed into 96 x 96 x 100mm case. The MA900 can reduce your panel cutouts and make your panel board smaller.

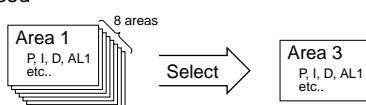

Multi-Memory Area

Up to 8 kinds of combinations of temperature set value, PID constant, alarm set value etc for each channel can be registered as "Memory area" (recipe).

The change of settings caused by the change of a process and product can be simply realized only by switching the "Area". The switching of the area by optional external contact input is also available.

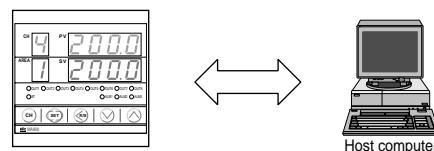

The available parameters for multi memory area :

SV, Alarm set values, PID constants, Anti-reset windup, Overlap/dead band, Setting change rate limiter, Channel used/unused

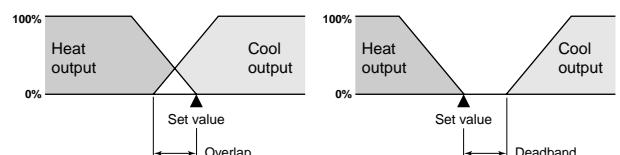

Digital Communications (Optional)

An optional communications interface, RS-232C, RS-422A or RS-485 is available for networking to computers, PLCs and SCADA software. MODBUS or ANSI (RKC standard) protocol can be selected. Up to 31 units can be interfaced on one RS-422A or RS-485 communication line.

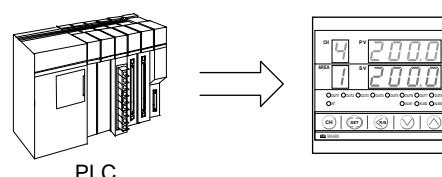

Heat/Cool Control (Optional)

The Heat/Cool PID control features heat and cool outputs for use where process-generated heat exists. This allows the input of overlap or deadband settings which contribute to energy savings.

Digital Contact Input (Optional)

An optional digital contact input is available for RUN/STOP and memory area switching. (RUN/STOP switching can also be completed at the front key panel.)

Multi-Loop Digital Temperature Controller MA900

Features

Multiple Alarm Functions

The MA900 provides a wide selection of alarm types to configure up to three alarms.

Alarm 1 (Standard) :

Temperature alarms, Loop break alarm, FAIL

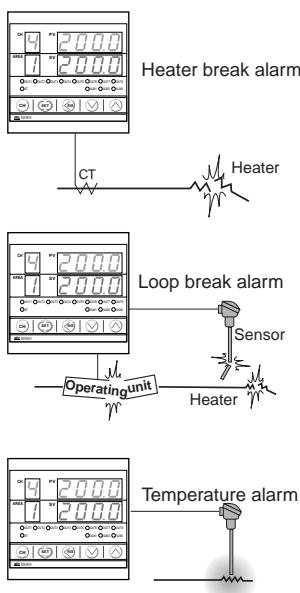

Alarm 2 (Optional) :

Temperature alarms, Heater break alarm, FAIL

Alarm 3 (Optional) :

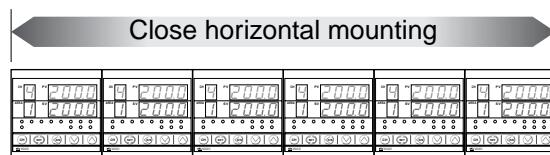

Temperature alarms, FAIL

Alarm output is common to all channels. But alarm 3 is available for optional independent output for each channel.

Close Horizontal Mounting (Optional)

The MA900 has been designed with a unique mounting bracket that allows close horizontal mounting of multiple instruments to save valuable panel space. Up to six units.

Six units maximum may be mounted together and maintain UL recognized, although it is possible to have more than six units.

Waterproof/Dustproof (Optional)

For operation in severe environments or when washdown is required, the IP65 rating is available for waterproof/dustproof protection.
